Unmanned Weighing Solution

Benefits

Live Data Transfer and Monitoring at HO «

Complete Transaction Auditing «

Control Weight Manipulation «

Automate Weighing Process «

Unmanned Weighbridge System is a Unique and True "UNMANNED" solution. It allows 24 X 7 weighing operations without the need of any permanent physical operator. Driver just need to carry the RFID card simply touch and go solution, All terminals are equipped with RFID reader, IP camera, Traffic Light, Vehicle positioning system, Printer, Loop sensor and Alarming system for a full proof robust system which will provide correct and audit able data. Same data can be transferred to Head Office for consolidated reporting and auditing purposes. HO has consolidated view of all transactions on various types of criteria such as "Supplier/Material/Vehicle No/Date Range". They also can audit any incomplete or suspicious entry which will automatically identified by the application. The system is easily integrated to SAP/ERP.

» Vehicle Position Monitoring System
» Announcement/Siren System
» Pit / Pit-Less Static Weigh Bridge
» Boom Barrier, Traffic Light
» Data Controller
» RFID Reader
